Cooperation in Respect of Fisheries in Adjacent Areas Under National Jurisdiction

Para 24: Is any part of your national jurisdiction area adjacent to the Area to which CMM 01-2024 (*T. murphyi*) applies?

YES ☒ If yes, please answer the questions below

- Have you decided to apply the measures described in CMM 01-2024 (*T. murphyi*) paragraphs 12-24 within your national jurisdiction areas?

YES ☒ NO ☐ Partial ☐

- Have you informed the Secretariat about conservation and management measures in effect for *T. murphyi* within your national jurisdiction areas (e.g., TAC resolutions)?

YES ☒ NO ☐

The national Chilean regulation, as has been explained in reports from previous years, is based mainly on the General Law on Fisheries and Aquaculture. This law establishes the decision-making process for fisheries measures, instituting not only Technical Scientific Committees (scientific advice) but also Technical Committee (body that brings together the different stakeholders). In addition, the law indicates in article 7E the process by which the CMMs adopted within the framework of international treaties that Chile is part of are applicable to the entire fleet and national activity. The foregoing

¹ The implementation of the following paragraphs can be found within the corresponding CMMs:
paragraph 14 (required data, annual catch report) can be found within CMM 02-2022.
paragraph 16 (VMS) can be found within CMM 06-2023.

paragraph 20 (CMS) can be found within CMM 10-2020.

materialized through a resolution (Resolution Ex. 911 of 2024) of the fishing authority that introduces measures into the internal legal system in Spanish and that is published not only in the Chilean Official Gazette, but also on its website. Then, the SPRFMO Secretariat shares this resolution in its website for those who need to see it in Spanish. All SPRFMO measures fully apply to the Chilean fleet in the Convention Area. In particular, CMM 01-2024 is not only applied in the aforementioned area, but also in the Chilean EEZ.

Additionally, in 2023 (December), Chile established a TAC through the Exempt Decree 164 of 2023 of the Ministry of Economy, Development and Tourism for all Chilean operations conducted on jack mackerel. It was calculated based on the discussions held before the SPRFMO SC and it was equivalent to total tons established for Chile in CMM 01-2024. In this opportunity, the TAC for Chile was 824,272. However, given the fact that the quota established for Chile at the last meeting was 819,720, such decree was amended for adjusting it to this latter amount.

NO ☐

Para 26: Are you a coastal State that has not given your express consent under Article 20 paragraph 4(a)(ii) of the Convention?

YES ☐ *If yes, please answer the questions below*

- Have you established domestic measures for catches of *T. murphyi* that may result in catches in the area under your national jurisdiction exceeding 106,735 tonnes?

YES ☐ NO ☐ *If no, continue to the next CMM*

Para 21: Did you conduct any research or stock assessments for *T. murphyi* during this past year?

YES ☒ *If yes, please answer the question below*

- Were they submitted to the Scientific Committee?

YES ☒ NO ☐

Chile, as it has done every year, informed the SPRFMO Scientific Committee (SC) through the National Report of the results of the investigations regarding Chilean Jack Mackerel. Among other matters on: i) Fishery Monitoring; ii) Bycatch Research and Monitoring Program for Jack Mackerel; iii) Hydroacoustic assessment of Jack mackerel between Arica-Parinacota and Valparaíso Regions, 2024; v) Assessment of the total allowable catch; and vi) Population Genetics of Chilean Jack Mackerel in the South Pacific Ocean.

Additionally, the following studies (working papers) were submitted to the SC:

- SC12-JM01 Spatio-temporal dynamics of the jack mackerel fishery off south-central Chile in 2024.
- SC12-JM04 Jack mackerel CPUE index and acoustic biomass in the south-central Chile.
- SC12-JM05 Hydroacoustic assessment of Jack Mackerel in the North of Chile in 2024.
- SC12-JM06 Update on CPUE standardization for the Chilean jack mackerel fishery in central-southern Chile using spatio-temporal Bayesian models.
- SC12-JM07 Incorporating a creep factor into the Chile Jack Mackerel CPUE index standardization.

YES ☒

NO ☐

Para 18: Please summarise or list the methods used to prevent tampering of ALCs on individual vessels

There are seals installed to prevent ALCs tampering. For this purpose, every time a vessel requires adding or changing equipment, this must be installed by an inspector from the Chilean maritime authority. In addition, every time a vessel is inspected, it is checked that the Security features are in place, including the verification of numbered equipment and seals.

Moreover, before the equipment is acquired, it must be certified. This includes, inter alia, having a series of alarms, whether it is for box opening, antenna blocking, and device turning on and off. After several tests, the respective vessel obtains such authorization through a resolution of the General Directorate of the Maritime Territory and Merchant Marine.

Para 19: Please provide the following information for each vessel flying your flag and reporting to the SPRFMO VMS (*Enter relevant details below or provide information as separate attachment*)

Vessel Name	Vessel IMO	Call sign	ALC Brand	ALC model	ALC identification	Security features
