
10TH MEETING OF THE COMPLIANCE AND TECHNICAL COMMITTEE (CTC)

Manta, Ecuador 7-10 February 2023

CTC 10 – Doc 05

Implementation Report: Commission Record of Vessels

Secretariat

1. Record of Vessels – Summary of 2022 changes

Paragraph 12 of CMM [05-2022](#) (Record of Vessels) requires the Executive Secretary to maintain a Record of Vessels authorised to fish in the Convention Area, and to make a summary of the Record publicly available on the SPRFMO [website](#). This Implementation report continues a series of reports provided to the SPRFMO annual meeting (e.g., [CTC9-Doc 07](#)).

At the 10th SPRFMO Commission Meeting, CMM 05 was amended to strengthen the language around the minimum mandatory data requirements for vessels to be added to the SPRFMO Record of Vessels (paragraph 12 of CMM 05-2022). As part of this change, the Commission directed the Executive Secretary (second footnote on page 2 of CMM 05-2022) to “*identify which vessels, if any, on the Record of Vessels do not meet the minimum information requirements*” and indicate that “*Such vessels shall be marked ‘incomplete’ in the Record*”. With respect to vessels with incomplete information, a deadline of 31 December 2022 was imposed for Members and CNCPs to “*either provide the outstanding information or request removal of such vessels from the Record of Vessels*”.

On 1 April 2022, all Members and CNCPs were notified of vessels on the Record of Vessels, both authorised and unauthorised, with incomplete records. The Secretariat provided a detail data deficiency summary to facilitate the process and asked Members/CNCPs to update the missing information or request removal of those vessels from the Record. A total of 1,602 vessels had incomplete records and 899 of those were authorised to fish in SPRFMO.

On 28 November 2022, Members and CNCPs with outstanding (authorised) vessel data deficiencies were reminded of the request to update missing data elements or to request removal of these vessels from the Record. The Secretariat provided an updated data deficiency summary to accompany this reminder.

Members were very responsive in taking action to provide the missing data elements required by CMM 05. The Secretariat wishes to acknowledge the substantial effort to compile this information and expresses appreciation to Members and CNCPs for their dedication and patience during this process. However, by 31 December 2022, 95 authorised vessels were still missing data elements required under CMM 05¹.

This exercise to bring the Record into compliance has raised some questions about the language in the CMM. Specifically, with respect to footnote i² of CMM 05-2022:

*“The Executive Secretary shall identify which vessels, if any, on the Record of Vessels do not meet the minimum information requirements. Such vessels shall be marked ‘incomplete’ in the Record. By no later than 30 April 2022, the Executive Secretary shall write to any Members and CNCPs whose flagged vessels have incomplete information and request that the Member or CNCP either provide the outstanding information or **request removal of such vessels from the Record of Vessels** before 31 December 2022.”*

It should be noted that paragraph 14 of CMM 05-2022 states that “*When a previously authorised vessel is no longer authorised by the Member of CNCP to fish within the Convention Area, such vessel shall not be deleted from the Record of Vessels, but labelled as ‘not currently authorised’*”. Therefore, the Secretariat maintains a full history of vessels that have been on the Record at any point in time. No records are ever deleted from the Record. When

¹ Of the 95 remaining authorised vessels missing one or more mandatory data elements, 16 were flagged to China, 1 to Ecuador, 77 to Peru, and 1 to the Russian Federation.

Members request removal of vessels, the Secretariat ends the authorisation period, which the classifies such vessels as ‘not currently authorised’.

2. Secretariat implementation

To ensure transparency, the Secretariat takes this opportunity to outline how vessel information is processed. If this implementation does not align with the intention of the Commission, additional guidance is requested.

Authorisation periods: In the SPRFMO database authorisation periods are stored as pairs of dates (start and end of the authorisation) that cannot overlap with a separate authorisation period for the same vessel. Overlapping authorisations can be problematic when summarising and analysing the Record of Vessel data. We understand that sometimes the end date of a vessel’s authorisation period is extended without a change to the start date or (more often) there is a delay between a vessel being authorised and the Secretariat being informed of the authorisation. To address these there are three fields in the database related to authorisation period: *Flag Authorisation Start Date*, *Authorised Start Date*, and *Authorised End Date*. The first of these values is the authorisation start date maintained by the flag-state (this doesn’t have to change when an authorisation is extended). The second start date is adjusted based on the date of request from Members to change an authorisation period and/or may align with the first date. The end authorisation date is simply the current end date of the authorisation. What this means is that when an extension to a vessel’s authorisation period is extended, the *Authorised Start Date* is updated to reflect the date the change is active from (often the email date). This allows for consecutive, but separate authorisation periods. There is continuity in the authorisation, however, the Secretariat maintains a record of when the authorisation periods were modified. This is largely an administrative point, but Member’s and CNCs should be aware of how these dates are managed, in case they appear different from flag-state records.

Given the 2022 request by the Commission to ensure all vessels included on the Record of Vessels meet the minimum data standards outlined in Annex 1, and the specific instruction in paragraph 12 of the CMM, the Secretariat will ensure that the minimum data standards are met before adding new vessels to the Record or reauthorising existing vessels.

3. Amendments for consideration

The Secretariat has submitted a proposal to amend CMM 05 (COMM 11-Prop 03). Here, those changes are briefly described as well as additional points the CTC may wish to discuss.

CMM 19-2021 (Marking and Identification for Fishing Vessels) entered into force on 1 January 2023. This CMM requires that fishing vessels authorised to in the Convention Area are marked on the vessel’s hull or superstructure such that they can be easily identified. External markings are currently a voluntary field with respect to CMM 05-2022 (Annex 1 para 3a). Given that external markings are now mandatory in SPRFMO, to strengthen the utility of CMM 19-2021, it is suggested to move the external markings data requirement to paragraph 2 of CMM 05-2022, which would make the provision of this information mandatory when authorising vessels on the SPRFMO Record of Vessels (see COMM 11-Prop03).

Para 2aa of Annex 1 describes the photo requirements for vessels authorised on the Record of Vessels. The text suggests that physical photos are to be submitted to the Secretariat (i.e., no smaller than 12 x 7 cm). Given technological advances, photos are expected to be submitted as digital photos, and therefore the text referring to physical photos could be removed from subsections i – iii and replaced with language appropriate for digital submissions (see COMM 11-Prop03).

There have also been questions raised regarding the intent of the 5-year time frame for photos. Clarification regarding whether this language means that: i) when a new vessel is added to the Record, photos must be provided that are no more than 5 years old; ii) when an authorisation is updated the corresponding photos must be no more than 5 years old; or iii) vessel photos must be updated every 5 years at a minimum. The Secretariat has generally interpreted this measure as ii; however, as part of the exercise to update data deficiencies in 2022, Members/CNCs were requested update photos that were more than 5 years old. If the intent is iii, some

consideration may be warranted regarding the monitoring of the photo expiration dates. Some Members have expressed concerns around the challenges associated with monitoring and updating vessel photos, relative to the 5-year timeframe.

4. 2021 List of Authorised Vessels (including Active and Transhipping vessels)

Paragraph 12 of CMM [05-2022](#) (Record of Vessels) requires the Executive Secretary to maintain a Record of Vessels authorised to fish in the Convention Area, and to make a summary of the Record publicly available on the SPRFMO [website](#). The Record of Vessels is actively kept up to date and available to the public.

4.1 Vessels Authorised and Active in the SPRFMO Area

Table 1 summarises the vessels that were authorised on the Record of Vessels by Member/CNCP in 2021 and shows (based on received submissions, fishing activity, and transshipment data) which vessels, by type, were active in the SPRFMO Area during the same year. It should be noted that Member submissions regarding activity of Motherships has generally been lacking; this information cannot be verified with any other extant SPRFMO data asset at this point in time.

During the 9th Compliance and Technical Committee meeting (CTC9) the Secretariat was asked to: *“to conduct additional validation procedures to cross check the fishing activity and ensure all vessels in the SPRFMO area have current authorisations”* (CTC9-Report para 22). To address this request, we have cross-checked all fishing activity reported in the SPRFMO Convention Area, from fishing activity and transshipment data, with the associated vessel authorisations dates. There was no vessel activity detected in the SPRFMO Area by unauthorised vessels in 2021.

As of 31 December 2021, the full Record of Vessels contained 1,609 authorised vessels of which 532 were active in 2021 (Table 1).

4.2 Complete SPRFMO Record of Vessels

Paragraph 13 of CMM 05-2022 requires that the Record indicates which of the authorised vessels have been actively fishing in each year. Table 2 indicates the list of authorised vessels that were active during the 2021 calendar year. It should be noted that in previous years, this report contained additional vessel authorisation and activity information. Specifically, in years past, tables indicating the full lists of authorised and unauthorised vessels have been detailed. However, as this information is readily available on the public Record of Vessels, it is no longer necessary to detail in this document.

The full Record of Vessels is publicly available via the SPRFMO website:

<https://www.sprfmo.org/web/public/vessel>

Table 1: Summary of the authorised SPRFMO Vessels in 2021, and vessels active in the SPRFMO Area, by vessel type.

Vessels by Member/ CNCP	Authorised Vessels	Vessels active in the SPRFMO Area during 2021
