International Consultations on the Establishment of the
South Pacific Regional Fisheries Management Organisation

Standard for Landings Data

With regard to the fishing, reefer or factory vessels flying their flag and fishing for or transporting non-highly migratory fishery resources in the Area-

Participants are to:

1. Collect data on an individual landings basis.
2. Collect the following fields of data:

   a) Current vessel flag

   b)   Name of vessel

   c) Type of vessel (carrier vessel, fishing vessel, factory vessel)

   d) Registration number of vessel

   e) International radio call sign (if any)

   f) Lloyd's / IMO number (if allocated)

   g) Date entered SPRFMO Area

   h) Date exited SPRFMO Area

   i) Landing date

   j) Area catch taken (e.g. FAO area[1])

   k) Landing Type (e.g. transhipment or not)

   l) Country of Landing (standard ISO 3-alpha country codes)

   m) Port/ Point of Landing

   n) Landed State* by species (see footnote)

   o) Landed (live) weight by species

   p) Containers – Type by species

   q) Containers – Number by species

   r) Containers – Content weight by species

   Landed state:
   This means the 'state' in which the fish was landed. States may include 'live' (fish has not been

---

[1] Discuss appropriate codes to use for 'Area taken'

processed and no part of the fish has been removed), or other states for example headed and gutted, filleted, etc.
