

South Pacific Regional Fisheries Management Organisation

Report of the 10th Data and Information Working Group Lima, Peru

18 October 2012

1. Opening of the Meeting

The meeting was opened by the Chair, Mr. Rafael Duarte (European Union).

2. Adoption of Agenda

The Agenda was adopted without amendments and is attached as Annex DIWG-01.

3. Administrative matters

A list of participants is attached as Annex DIWG-02. The Chair reviewed the meeting documents listed in the paper DIWG-10-03.

4. Election of Rapporteur

The Working Group agreed that the Secretariat should serve as rapporteur for the meeting.

5. Intersessional Work

5.1 Investigation into potential double-counting of catch between New Zealand and Ukraine (FAO 81 – *Trachurus* species)

The Interim Secretariat introduced the paper DIWG-10-04. The duplication of data is noted in the Data Paper prepared by the Interim Secretariat (DIWG-10-INF-01) and the data could be so flagged in the database.

5.2 Landing/Transshipment Standard Fields “Name of Observer” & “Port Authority”

The Interim Secretariat introduced the paper DIWG-10-05. They noted the options for “Name of Observer” and “Authority/Port Authority” in the paper.

The Working Group expressed the importance of distinguishing between the roles of scientific observers and Inspectors and was concerned about possible confusion in the Standard. However, the Working Group did not propose an amendment to the standard. It accepted the options proposed in paper DIWG-10-05.

6. Observation of Landings vs Observed Fishing events

The Chair and Data Manager introduced the item noting that Observer Templates and Associated database tables have been designed using Annex 8 of the Data Standards and accept observations based upon individual fishing events. This would require the observer information to be collected at sea. However, accumulated information by fishing trip in some cases is

collected by observers in port and this is another potential source of information for vessels not covered by an observer at sea. The current Data Template does not provide for the collection of this type of information.

The Working Group recognized that observer information collected at unloading would be valuable and noted that by creating a new template for these data, it should be possible to acquire them by modifying the data template to remove the fields that would not be collected for data collected at unloading. It asked the Interim Secretariat to develop a new module for the database to accommodate this.

Chile recalled that paragraph 11 of the 2011 Interim Measures for Pelagic Fisheries requires annual catch reports on a tow by tow in the case of trawlers, and trip by trip in the case of purse-seining fishing vessels. In addition, some Chilean vessels are sampled at unloading. In response to a question about future requirements for observer coverage, the Executive Secretary said that was a matter for the Commission rather than the Working Group.

7. Summary of data submitted to the Interim Secretariat

The Interim Secretariat presented paper DIWG-10-INF-01 .

8. Update on the SPRFMO Database

The Interim Secretariat presented an update on development of the SPRFMO database in DIWG-10-06 and encouraged the members of the Working Group to the use of the database.

9. Other Business

There was no other business and the meeting was adjourned pending the production of a draft report.

10. Adoption of the Report

The report was adopted by consensus.

The meeting closed at 1445 hrs on 18 October 2012.
